

10. (Amended) A drill bit comprising:  
a bit body having at least one blade thereon; and  
at least one polycrystalline diamond compact cutting element disposed on the at least one blade, the at least one polycrystalline diamond compact cutting element comprising:  
a polycrystalline diamond layer;  
substrate bonded to the polycrystalline diamond layer, an interface surface between the diamond layer and the substrate being non-planar;  
wherein a diameter of the at least one polycrystalline diamond compact cutting element is greater than 20.0 mm.

18. (Amended) A drill bit comprising:  
a bit body having at least one blade thereon; and  
at least one polycrystalline diamond compact cutting element disposed on the at least one blade, the at least one polycrystalline diamond compact cutting element comprising:  
a polycrystalline diamond layer having a thickness greater than 0.140 inches;  
a substrate bonded to the polycrystalline diamond layer, an interface surface between the substrate and the diamond layer being non-planar;  
wherein a diameter of the at least one polycrystalline diamond compact cutting element is greater than 20.0 mm and is less than 25.0 mm.

Please add the following claim:

- 27. (New) A drill bit comprising:
